### **Description about the event:**

Kolli Srinivas addressed the students of pharmacy that Recent Trends in Herbal Drugs, in recent years, more people throughout the world are turning to use medicinal plant products in the healthcare system. The worldwide need for alternative medicine has resulted in the growth of natural product market and interest in traditional systems of medicine. He discuss about Herbal drug technology is used for converting botanicals materials into medicines, where standardization and quality control with proper integration of modern scientific techniques and traditional knowledge are important. Herbal medicines make up a significant constituent of the tendency toward alternative medicine. Herbal medicines have been used since the dawn of civilization to maintain health and to treat various diseases. To compete with the growing pharmaceutical market, there is an importance to use and scientifically authenticate more medicinally useful herbal products. He explained in brief about a general idea of herbal medicines and intended to explain the therapeutic effectiveness of various herbal medicines, adverse drug reactions, drug interactions, standardization and stability testing of herbal medicines, pharmacovigilance and regulatory status of herbal medicines.
